# Your 90-Day Roadmap to \$1,000/Month

Most people who want to build income online never start — or they start, get overwhelmed after two weeks, and quit. This blueprint solves that. Every day for 90 days, you know exactly what to do, in what order, and why. No guessing. No wasted effort. Just a clear path from zero to your first \$1,000/month online.

| PHASE   | DAYS  | FOCUS | GOAL                                                      |
|---------|-------|-------|-----------------------------------------------------------|
| Phase 1 | 1–30  | Build | Foundation live: brand, blog, and first Etsy product      |
| Phase 2 | 31–60 | Grow  | Traffic flowing: SEO ranking, social presence, email list |
| Phase 3 | 61–90 | Stack | Multiple income streams generating first \$1,000/month    |

## The Rules of This Blueprint

1. Every tool recommended is free. You need \$0 to start.
2. Daily tasks take 1–2 hours. This is designed around a full-time job.
3. Do the tasks in order. Each phase builds on the last.
4. Skip a day? Pick up where you left off — don't restart.
5. Done is better than perfect. Ship it and improve it later.

■ Screenshot your Day 1 stats (traffic: zero, revenue: zero, followers: zero). You'll want the proof of where you started when you hit Day 90.

Layer multiple revenue streams until you hit \$1,000/month.

### Phase 3 Overview

Phase 3 is where the work from the first 60 days starts compounding. Your blog is ranking. Your Etsy shop has reviews. Your email list is growing. Now you layer in more income streams — ad revenue, more affiliate programs, higher-priced products — until you hit your \$1,000/month target.

- Day 83 — Write blog post #24. Evergreen educational post: 'beginner's guide to X.'
- Day 84 — Send email newsletter #7. Offer a limited-time discount on your top Etsy product.
- Day 85 — Add a shop/products page to your website listing all your Etsy products.
- Day 86 — Write blog post #25. Target a keyword a competitor is ranking for.
- Day 87 — Create 20 new Pinterest pins for your most recent 10 blog posts.
- Day 88 — Review every income source. Calculate your projected monthly run rate.
- Day 89 — Write blog post #26. Title: 'How I Built a Side Hustle in 90 Days' — publish it.
- Day 90 — Screenshot everything. Calculate total revenue across all streams. Plan Month 4.

■ Day 90 Target: \$1,000/month run rate. This comes from: Etsy digital products (\$300–500) + Affiliate commissions (\$200–400) + Display ad revenue (\$100–300) + Email promotions (\$100–200). Even hitting 60% of this target puts you at \$600/month in passive-leaning income after 90 days.

# Your Income Projection by Stream

Here's a realistic breakdown of what each income stream can produce by Day 90 if you follow the blueprint consistently:

| INCOME STREAM         | HOW IT WORKS                              | CONSERVATIVE | REALISTIC  |
|-----------------------|-------------------------------------------|--------------|------------|
| Etsy Digital Products | 5 products × avg \$12 × 3 sales/day       | \$180/mo     | \$540/mo   |
| Affiliate Commissions | Blog posts + email list driving clicks    | \$150/mo     | \$350/mo   |
| Display Ads (AdSense) | CPM on 5,000–15,000 monthly sessions      | \$50/mo      | \$180/mo   |
| Email Promotions      | Weekly newsletters to 200–500 subscribers | \$50/mo      | \$150/mo   |
| TOTAL                 |                                           | \$430/mo     | \$1,220/mo |

■ These projections assume consistent daily action. Every week you miss compounds against you — every week you execute compounds for you. The math is simple. The discipline is the hard part.

## What Happens After Day 90

Day 90 is not the finish line — it's the launchpad. Here's what the next phase looks like:

### Month 4–6: Scale to \$3,000/Month

Continue publishing 2 posts per week. Apply for Mediavine (50k sessions threshold). Launch a higher-ticket product (\$47–\$97). Build a YouTube channel around your best blog content. Start building backlinks aggressively.

### Month 7–12: Scale to \$5,000–\$10,000/Month

Hire a freelance writer for 2 posts/week so you can focus on strategy. Add a premium product or mini-course (\$97–\$197). Grow your email list to 1,000+ subscribers. Launch a second Etsy shop in a complementary niche.

■ The creators making \$10,000/month from content did the same things in this blueprint. They just did them for 12–18 months instead of 90 days. Consistency over time is the only real secret.
